

Review of [Anal Hell](#)

by the Stroke King's [Adult Reviews](#)

Introduction:

Anal Hell is a [Anal](#) , [High Def Porn](#) site. Sex is nothing more than a chore for some selfish chicks, so guys need to take every opportunity to ram their tight wet holes and there's no reason to use only two - when a 3rd hole is also available for free... and filmed in full HD.

Review:

[Anal Hell](#) features a total of 42 exclusive anal-themed episodes that are broken into 1, 2, or 3 scenes, each about 10 minutes long. The episodes that are a single scene are all solo anal masturbation sessions. The hardcore boy/girl and few girl/girl scenes are all spread out over 2 or 3 videos, bringing the total runtime for a hardcore scene between 20 and 30 minutes. A new segment is uploaded once a week

Every AnalHell scene is available in full HD as a 1280 x 720 2Mbps .wmv file. Needless to say, the visual and audio quality is top-notch. And they won't necessarily eat up all of your hard disk space, because most of the files are under 200 Megs. If you don't want to start off with downloading the HD quality version, you can also select either a lesser-quality .wmv or Quicktime .mov file. None of the files make use of DRM, so what you download is yours to keep forever. All three formats from analhell.com are able to be streamed from the website as well.

The [Anal Hell](#) videos are professionally shot, and you'll feel like you're watching a scene from a major DVD release instead of something just produced for the web. Production values are top-notch, with careful attention given to the setting, lighting, and grooming of the stars. There are no lame reality-type gimmicks either, every minute of film is dedicated to the high quality porn you paid for. It's very difficult to single out just one or two scenes, since all of them have the same high attention to detail, and all of the talent looks good and gives a great performance.

In fact, it seems that the AnalHell owners put so much effort into the production of the content, that they unfortunately neglected to make the site as surfer-friendly as it should be. There is no way to preview all or most of the available content on a single page, and no search feature has been implemented. You'll have to scroll through each page of updates to find out what's available. Since some stars appear in more than one scene, this lack of grouping makes it more difficult than it should be to find the content you really want, fast.

The same concept holds true for the AnalHell.com picture sets. The pictures themselves are great... they are professionally shot with high-end equipment and displayed in ultra-large 1024 x 680 resolution. But they are completely disorganized. It seems that some of the picture sets do accompany the videos, but there is no way of telling what picture sets relate to a specific scene. The sets are just represented by a single cropped thumbnail that is not labeled with anything. And each set features multiple contact sheets whose thumbnails are also cropped, so you really have no way of knowing if a specific pic has the exact angle you're looking for, unless you click on it.

Monthly membership to AnalHell.com currently costs \$29.99 per month via major credit card or online check. A full monthly membership also gives you access to the Silver HD Network, which is a collection of 16 exclusive sites with similar HD content. The network staggers its update schedule across all of the sites, so every single day you'll be treated to several brand new HD quality scenes. And finding what's new is made very easy, because the site keeps track of the daily updates on the main members page.

For this reason, you're better off skipping the three day trial even though it's a very inexpensive \$1.85. You won't be able to access any of the other websites, and if you forget to cancel within the trial period, the membership will auto-renew at a sky-high rate of \$39.98 per month.
