Review:

[AssesInPublic](#) is a brand spankin' new site from the Brazzers production house. Raw, real and dirty, watch these horny chicks cruise the streets meeting strangers that they flash, and encourage to smack their asses or squeeze their tits. The more the guys stop and gawk, the hornier they get until their pussies are creaming for a huge cock to ride. With no time to spare trying to find a hotel, these chicks get their groove on in semi-secluded places knowing that at any moment they could get caught in the act. The sex is fast and furious as these ladies bare more than just their [AssesInPublic](#).

Since this is a brand new project from Brazzers, [AssesInPublic](#) only has 13 videos posted to date, but you can expect big things from the site in the future. At this resolution the video is slammin' when played back at its normal size. You may notice a little pixilation if you watch at full screen but the sex is so fuckin' rock star your cock will hardly notice.

Brazzers makes every attempt to make their site accommodating to both broadband and dial-up users. For broadband users, clips have been loaded as full scenes, in five-minute segments and as streaming files. The full scenes are super large files that will average around 400MB each. If you want to keep your download time shorter the 5-minute clips run about 70MB each and allow you to tailor what you want to see. Dial-up

users will have to stick to the one-minute clips since the average file size is about 12 to 14MB each. All files have been posted in both .wmv and .mpeg format so the site should make both Mac and PC users happy. The .mpeg files run consistently larger than the .wmv files.

In what has become an industry standard, Brazzers has posted hundreds of photos to compliment the video content on [AssesInPublic](#). Each scene will feature both High Quality photos as well as screen capture images. The High Quality photos are usually posted at a resolution of 600x900 so you could get a decent print out of these if you so desired. Most clips will feature high quality shots of the stars posing for the camera (first clothed then naked), which is cool since it's like your own personal magazine layout of the star. In addition don't miss out on the hundreds of screen caps posted as well. With a resolution of 640x480 you can't do much enlarging but these contain the still shots from the actual scene as it's being shot.

[AssesInPublic](#) is part of the Brazzers network and that network has a fantastic hub design which allows you to see all of their other sties in one simple home page. Once you log on, you will instantly see the most recent updates to their catalogue. By clicking a site name, all of those sites videos will be visible to you from most recent on back. For each scene there is a description of the action, tag words that are linked to allow you to find similar content and a trailer preview for many of the scenes themselves. Brazzers knows how to design a good site so no worries in that department.
