Introduction:

Baby Got Boobs is a [Big Tits](#) site. Get ready to sink your cock between some super huge tits because on this website A-cups and B-cups need not apply! A daily dose of double "Ds" is what you will find when you login to BabyGotBoobs and see the kind of milk-maidens they put into action as these big tit starlets let you squeeze their melon-sized milk makers while you fuck their warm wet holes.

Review:

These sexy starlets have been blessed with boobs that will have your cock knocking at your zipper in no time. Sluts with curves in all the right places show off their tits as the true handfults that they are, but best of all ever one of these honeys love to get fucked on film. It's amazing that they can keep their balance riding cock with those big jugs swinging free as they get rammed from behind. Launch your cock balls-deep at [BabyGotBoobs](#).

Hot chicks with big boobs and a desire for some hard cock must be easy to cum by these days. [BabyGotBoobs](#) has over 129 videos currently posted to and the site is still updating. Most of the hardcore action will play back at a resolution of 640x480 for its normal size. This gives you a super clear image that is sure to put your cock on alert. For fans of full screen viewing, the 640x480 resolution will hold up but expect to see some slight blurring and pixilation. Some of the older material was shot at a slightly lower resolution but the image produced is still respectable.

All of their video content can be downloaded as either a .wmv file or an .mpeg file. For broadband users, Brazzers has loaded full scenes that come down as one large file. If you want the whole scene in one shot, you can expect to see files in the 500MB range. Figuring not all members would want to deal with such large files, clips have also been edited into 3 to 5 minute segments. Each of these clips will average about 60MB. For dial-up users, Brazzers has loaded some one-minute clips that average about 16MB each. Once again, some of the older material does not feature one-minute clips but since it is often presented at a slightly lower resolution the smaller clips have smaller sizes that can be handled with a dial-up connection.

Complimenting the video library, [BabyGotBoobs](#) features an extensive library of high quality photographs for your enjoyment. These magazine quality images were shot at 800x600, so they are good enough to be saved to your hard drive or disc. The images run from softcore stripping and teasing to more hardcore shots of pussies full of cock or cum. The boys over at Brazzers have also provided hundreds of screen shots to go along with the video content. Although they are shot at a lower resolution they still provide good stop action images of the scenes.

Navigating the site is super easy to do. One of the best features is that the page uses tabs to allow you to get around the site. So if you are checking out the video action and want to take a quick look at the photo content, all you need to do is click on the appropriate tab. It saves a lot of time over having to scroll to the top or bottom of a page or having to use that back button.
