So settle down and get ready to watch these wide-eyed sluts take on more cocks than you'd think they can handle.

Review:

The [Gang Bang Squad](#) is a huge site that has 120 exclusive gangbang videos that are available in a wide variety of formats. The setup of each scene is typical reality porn, so expect a young dumb slut to get picked up and fucked before she fully understands what's going on around her. A new scene is generally added two times per month. Since the site has been around for a few years, you'll find that the scenes feature both up and coming porn starlets as well as some older favorites who have long since left the business.

The recent [Gang Bang Squad](#) additions are available in much better formats than its older content. The new scenes can be both downloaded and streamed either in multiple clips or as a full length video. The resolutions are graded and range from a small fuzzy 56Kbps file suitable for dial-up consumers, all the way up to an HD format displayed in 1068 x 600 resolution and encoded at 3680Kbps. The streams are available right from within your browser, and the downloads are free of DRM. Each video is about 45 minutes long and all feature hot and horny babes getting stuffed with cocks from all different angles and positions. The gangbangs range from four guys to sometimes five or six. Pussies, asses, and mouths are all equal-opportunity receivers, and the girls and guys ethnicities are generally also varied throughout each scene. So there's something for everyone here.

The main members page is nicely organized and split into several areas. The latest [Gang Bang Squad](#) addition is front and center, with a text blurb and thumbnails representing the action. Since the site has been around for a while, you can easily determine if your favorite porn star from a few years ago appears on the site by using a handy search box that is on the upper left side of the screen. And if there's a brand new whore that you'd like to see violated by multiple dicks, then use the quick and easy suggestion box to make your case directly to the webmasters.

You can reach the exclusive [Gang Bang Squad](#) area by clicking on a box in the middle of the login page. Once there you'll see that all updates are organized in a 4 x 3 grid, with each whore represented by her name and a headshot. There are icons underneath her picture that tell you what type of content the scene has. It's important to pay attention to this info because not every scene has the same exact content (just hover over the icon and you'll find out what it means).

From here you can reach each scene's associated photo gallery. All pictures are presented in 800 x 533 resolution. They are all shot with a separate digital camera, and are not just screencaps. The action between the pics and vids may not match exactly, but looking at the pictures is a good way for you to figure out the flow of each scene. Each set contains about 100 pictures.

The cost of a monthly membership to [Gang Bang Squad](#) is currently priced at \$29.95, and you can sign up with either a major credit card or online check. A full monthly membership will also get you access to 23 additional websites that are within the porn star network. These sites all feature exclusive content in several different popular niches. If you use the search feature that was mentioned earlier, it works across the entire network of sites. And chances are pretty high that if your favorite slut appears on one site, she probably appears on a few more. Keeping track of the exclusive network content is easy if you pay attention to the members update calendar that is available on the main login page.

Your first month of membership to [Gang Bang Squad](#) will entitle you to download up to 24 videos. If you remain a member for longer than one month, then each additional month will get you 48 downloads. Not all scenes are downloadable (the older content especially), so make sure you pay attention to the icons next to each exclusive scene.

You can choose to sign up for a cheaper trial membership as well, but it's not recommended. The trial periods range from 2 days up to a week, but none of them will get you full access to the entire network, and you won't be able to download a thing. And if you do like what you see and decide to let it auto-renew, you'll be billed \$39.95 which is significantly higher than if you just join for a month right away.
