Introduction:

New Solos is a [Sex Toys](#) , [High Def Porn](#) site. You may have seen solo masturbation performances before but not like these. These are NEW Solos and that means a whole new breed of porn performers giving you a perfect view of their sexy finger fluttering action in real 1280x720 high def sex scenes!

Review:

NewSolos is a huge site that features 78 episodes of fresh young babes in solo masturbation sets, with a new clip added every week. Most of the episodes consist of a single video file that's approximately 10 minutes long, though some scenes are longer and separated into two files. There is no setup to each scene -- every one gets right into the action where you can see the girl give a sexy striptease before playing with her clit until she trembles with an earth-shattering orgasm.

All of the videos are shot and presented in a crystal clear 2Mbps .wmv file in 1280 x 720 resolution. Since the scenes are kept to only 10 minutes each, file size isn't an issue, with most of them averaging about 200 megs each. If you're not well equipped to download these files, then they are also offered as a lower resolution .wmv and also in a Quicktime .mov format. All three of these formats can also be streamed from the website instead of downloaded, but you're free to save your favorites for posterity, since the site is not protected with any form of DRM.

The sets used at NewSolos are top-notch, with a keen attention to detail that really enhances the HD viewing experience. The camerawork is first rate, with a great mix of angles so you get up-close views of throbbing, wet clits, as well as some nice full-body shots to watch the sluts squirm. The girls also look really good, with professionally applied makeup and hair and matching sexy outfits. All in all, NewSolos.com offers a welcome upgrade over the many other generic sites that feature the same type of content.

For all the attention to detail that the producers paid to the actual content, you'd think they would also put as much effort into the design of the site. But unfortunately that is not the case. There are a lot of scenes to surf through, and the only way to see them all is to scroll through each page of video updates that shows seven at a time. Since some of the girls appear more than once, this makes it much too difficult to find your favorite starlet. And because each clip is only represented by a single photo, you're not able to preview the full flow of the scene without actually downloading or streaming the entire video.

There are over a hundred picture sets at NewSolos, most of which are related to an existing video. But the videos and pictures are not linked to each other, so you'll have a hard time figuring out which set goes with what. The available sets are just thrown on a few pages with zero identifying attributes, so unless you recognize your favorite porn slut from a small cropped thumbnail, you will have no idea who each pic set features. This is really a shame, because the [New Solos](#) photos themselves are ultra high quality. They're shot with a high end digital camera, framed nicely, and presented in 1024 x 680 resolution.

A one month membership to NewSolos.com is priced at \$29.99, and you can sign up with either a major credit card or by using an online check. A monthly membership also gives you access to the Silver HD Network, which is a collection of 16 sites that all feature HD videos in a wide selection of different porn niches. All sites within the network are updated on a weekly basis, and the update schedule is staggered so that every day will bring you several new scenes. Keeping track of the newest content is easy, because there is an update calendar on the main members homepage.

Access to this network is the main reason why you should forget about signing up for the three day trial, even though it only costs \$1.85. The monthly fee is reasonably priced for the amount of content offered, and if you forget to cancel before the trial period expires, you'll be automatically renewed at the sky-high rate of \$39.98 for the next month.
