With 109 videos currently posted to [RacksandBlacks](#) your cock is going to be sore from all the stroking it's gonna get. These guys lay into these girls with huge cock and show them no mercy. Video will play back at 640x480, and will give you a clear and tight image if played back at its normal size. If you push it out to fit to screen you can expect to see some slight blurring and pixilation but the image is still of decent quality.

In an effort to be friendly to both dial-up and broadband users, Brazzers has posted video content in a number of ways. For broadband users, there are full files that will get you a whole scene in one large download. These files are very large and can average between 450 and 500MB each. Since these are really big files, broadband users can also download scenes in 5-minute segments. Each of these clips will average about 90MB. For dial-up users, Brazzers has loaded files in one-minute clips that average about 16MB each. Checking out the one-minute clips is a great way for all users to preview what you will see in each scene prior to downloading it. All files are available in both .wmv and .mpeg formats making both PC and Mac users welcome.

In addition to all the hardcore video content, members will find they have access to hundreds of high quality photo images as well. These images have been professionally shot and typically feature solo shots of the starlet getting naked, followed by some posed shots of her getting fucked. You can expect the pictures to range from hot softcore to down and dirty hardcore images. Presented at a resolution of 800x600 they are suitable additions to any permanent collection you may have. The fun doesn't stop there. You will also have access to hundreds of screen caps as well. Although they are not shot at quite as high of a resolution (640x480), they capture all the hot action one frame at a time.

Brazzers has done an excellent job of designing their site. Some of the basic navigation may take a little getting used to in the beginning but you'll be downloading hardcore content in no time. Once you select a scene that you are interested in, you can navigate around its content by using a series of tabs. So to jump from "High Quality Pics" to "Download Movie" all you have to do is click on the appropriate tab. They have eliminated the need to constantly use your back button, which is key.

The King finds this a perfect combination... like wings and beer.
