## Introduction:

Tori Stone is a [Teen](#) , [Solo Girls](#) site. When she found out how much fun her older sister Tawnee Stone was having as a Lightspeed Teen network girl, Tori knew she wanted to join the party too. ## Review:

It's not easy to have a hot older sister with her own super sexy website and to have to see all the attention and action she gets. What's a little sister to do other than wait for the day she turns 18 to start a site of her very own! On her 18th birthday Tori signed on the dotted line and became yet another hot starlet getting her first break as a Lightspeed Teen network girl with her site ToriStone. She has the face of an innocent college freshman but a body that was made for sex. She is new to Lightspeed, so her content tends to be more on the softcore side. But if she follows in her sister's footsteps, it won't be easy for her to hide her naughty side for long. Watch as she blossoms into the sexy little porn star slut that she wants to be on ToriStone.

ToriStone is one of Lightspeeds latest conquests in the hunt for horny little 18-year-olds that want to bare it all for the camera. Updating every week on Saturday, it won't be long before [Tori Stone](#) starts to experiment more with her sexuality and the boundaries she is willing to cross on film. As a member to her site, you and your cock get to enjoy every minute of her sexual adventures with her. She is already into masturbating for you and it won't be long before she is inviting over all her hot friends to join in the toy play. Tori already posted 13 videos and 10 high quality photo sets for you to get to know her and her pussy better.

Although she is still new to the business, Tori is starting to get a little more daring with what she will do for you. One thing is for sure, she has no problem spreading her legs wide and pulling her pussy lips apart so that you can get a real good look at her tight little whole. Your cock is going to swell as it dreams of slipping into that deep, wet abyss of pleasure. Here photo sets are shot at 800x600 so you may not be printing posters, but the image is so clear your mouth will start watering as you wonder how sweet her freshly shaven pussy will taste. There is even a video clip that features her shaving that perfect pussy and it's all for you.

The video content for the Lightspeed Teen network sites is shot at a consistent resolution of 480x360. When

watched at its normal size the image is ok. But video shot at this resolution will suffer from blurring and pixilation the more it is enlarged for viewing. If you like to watch your video porn full screen, these clips may look a little grainy to you.

Lightspeed has gone the extra mile with the number of ways in which you can download video files from their site. Boasting one of the largest selections of file types, members can download .wmv, .mpeg, Quicktime, ipod/psp, or mobile 3g2 files. How they present the files also makes the site friendly to both broadband and dial-up users. For broadband users, scenes are posted as full movies available for download. Depending on how long the scene is, these files can range from 20MB to over 70MB. Broadband users will have no problem managing these files.

Dial up users will be better off sticking to the segmented scenes. The Windows Media and MPEG versions of the scene allow members to download the action as short clips. These individual clips average about 9MB each making them much more manageable with a dial-up connection.

Your membership to ToriStone gets you access to many of the other sites in the Lightspeed Teen network.
